Summary of the Applicant's Presentation

Presentation is in the case folder.

Applicant talked about what they are rezoning from/to and the minor lot line adjustment currently in process.

Information Presented/Format of the Meeting

The applicant screen shared their presentation which included the site plan and details about the Mountain Residential zone district.

Overall Impression/Tone of Meeting

The applicants covered the application intent and answered community neighbor questions. The answers were short and direct. The tone of the meeting was tense.

Main Points/Issues Raised by Citizens/Applicant's Response

Adjacent neighbor concerned about rear and side setbacks not meeting for the cabin. Called out applicant for having a short term rental that is not legally allowed in this zone district. Wanted to know how this got zoned to MR-1 with the Minor Adjustment issue that has not been addressed - applicant responded and said why this occurred.

Nearby neighbor stated that the cabin is beautiful and wants to submit positive comments in support. Adjacent neighbor asked her how she knows the applicant, she said it is none of his business.

Multiple neighbors asked about how and when and what kind of public comments can be provided.

Figure 1: The subject property and vicinity.

1. SUBJECT REQUEST

The applicant is requesting to Rezone the subject property from the existing Mountain Residential – Two (MR-2) zone district to Mountain Residential – One (MR-1). The applicant has stated their Rezoning request is due to their desire to apply for a Special Exception for a Short-Term Rental, pursuant to Section 11 of the Zoning Resolution (ZR). Under Section 11.B.e.(1) of the ZR, an applicant can apply for a Special Exception for a Short-Term Rental use in the MR-1 zone district, but not the MR-2 zone district. The approval of this Rezoning would not allow a Short-Term Rental; the applicant would still have to apply for the Special Exception for Short-Term Rental, and their application would have to be approved by the Board of Adjustment (a separate public hearing), based on certain criteria in Section 11 of the ZR, in order to receive a Short-Term Rental permit.

2. CONTEXT

The subject property is in western Jefferson County, about 0.4 miles southwest of S US Highway 285. It is southwest of Clearview Road and north of Evergreen Road. The property is 1.009 acres in size.

This parcel is adjacent to single-family residential properties on all sides. The lots to the north, south, and east follow Mountain Residential – Two (MR-2) zone district requirements. The lot to the west follows the Agricultural-Two (A-2) zone district requirements. This area is characterized by single-family residential land uses. There is one single-family dwelling unit on the lot currently. The zoning went into effect for this property in 2021.

3. SURROUNDING ZONING/LAND USE

	Adjacent Zoning	Land Use
North:	Mountain Residential – Two (MR-2)	Single-Family Residential
South:	Mountain Residential – Two (MR-2)	Single-Family Residential
East:	Mountain Residential – Two (MR-2)	Single-Family Residential
West:	Agricultural – Two (A-2)	Single-Family Residential

4. SUMMARY OF PROPOSED CHANGES

	Current Zoning (MR-2)	Proposed Zoning (MR-1)
Allowed Land Use	Single-Family Dwelling, Two-Family Dwelling or Duplex, Group Home for up to 8 people (aged, developmentally disabled, or mentally ill), Public Park, Telecommunication, Energy Conversion Systems	Single-Family Dwelling, Group Home for up to 8 people (aged, developmentally disabled, or mentally ill), Public Park, Telecommunication, Energy Conversion Systems
Setbacks	Front (Primary Structure/All Garages): 30 feet Front (Housing Livestock or All Other Accessory Structures): 100 feet, 50 feet Side (All Structures): 15 feet Side (Adjacent to street/road): 30 feet Rear (All Structures): 20 feet	Front (Primary Structure/All Garages): 30 feet Front (Housing Livestock or All Other Accessory Structures): 100 feet, 50 feet Side (All Structures): 20 feet Side (Adjacent to street/road): 30 feet Rear (All Structures): 20 feet
Minimum Lot Size	Single-Family Dwelling: 17,400 sf Two-Family Dwelling: ½ acre (10,000 sf minimum area per unit) Duplex: ½ acre	Single-Family Dwelling: 17,400 sf Two-Family Dwelling: N/A (use not allowed) Duplex: N/A (use not allowed)

The primary changes that could result from this Rezoning are reduced allowable land uses (no Two-Family Dwelling or Duplex allowed), and an increased side setback.

5. TRANSPORTATION

The proposed Rezoning on the subject property is anticipated to have minimal impacts to the existing transportation network. Access to this property is from Columbine Drive, an unpaved County-maintained street. Staff determined that the potential trips generated by the permitted uses within the subject property will have negligible impacts on the surrounding transportation network.

6. CRITERIA FOR DECISIONS FOR PLANNED DEVELOPMENT REZONING APPLICATIONS

Section 6 of the Zoning Resolution states, *in reviewing Rezoning and Special Use applications, the Planning Commission and the Board of County Commissioners may consider the following criteria:*

- ✓ a. The compatibility with existing and allowable land uses in the surrounding area.
 - ✓ b. The degree of conformance with applicable land use plans.
 - ✓ c. The ability to mitigate negative impacts upon the surrounding area.
 - ✓ d. The availability of infrastructure and services.
 - ✓ e. The effect upon the health, safety, and welfare of the residents and landowners in the surrounding area.
-

a. The compatibility with existing and allowable land uses in the surrounding area.

The proposed use, a single-family dwelling, is compatible with the existing and allowable land uses in the area. The proposed zoning pairs well with existing residential uses already surrounding the subject property. If Rezoning is approved, the impacts to the surrounding community are expected to be minimal.

b. The degree of conformance with applicable land use plans.

The Comprehensive Master Plan (CMP), an advisory document required by State statute, contains Goals and Policies that are used to guide land use decisions. The Area Plans section of the CMP contains supplementary policies and land use recommendations for evaluation.

	Summary	Conforms with CMP?  
Land Use	The CMP discusses the need for a variety of uses to create a vibrant, enduring community. The Plan encourages diverse communities in which to live, work, and enjoy outdoor recreation.	
Physical Constraints	The CMP describes physical constraints as those physical features that due to safety concerns may potentially restrict where and how development occurs. Physical Constraints include geologic hazards and constraints, floodplains, wetlands, wildfire, radiation, landfills, abandoned mines, and wildlife habitat	
Community Resources	The CMP contains policies that relate to historic structures or sites, scenic corridors, natural features, air quality, light, odor and noise pollution, open space and trails.	
Infrastructure Water and Services	The CMP describes the importance of new developments having adequate Transportation, Water and Wastewater, and Services.	

Staff concludes that the subject request is in general conformance with the applicable goals and policies of the Comprehensive Master Plan (CMP).

Land Use: The subject property is in the Conifer/285 Corridor Area Plan of the CMP. The land use recommendation is an Area of Stability, which means density levels should not change in these areas. Any new development or redevelopment in these areas should be consistent with the character, scale, uses, and typical lot sizes of the properties in the general vicinity. Lot sizes should remain the same or increase in size. The proposed rezoning from MR-2 to MR-1 would require the same lot size for single-family dwelling units (17,400 sf) and the two-family dwellings and duplex land uses allowed under MR-2 are not allowed in MR-1 zone districts. The proposed Rezoning to follow the MR-1 zone district is in general conformance with the CMP's land use recommendation.

Physical Constraints: The CMP describes physical constraints as those physical features that due to safety concerns may potentially restrict where and how development occurs. Physical Constraints include geologic hazards and constraints, floodplains, wetlands, wildfire, radiation, landfills, abandoned mines, and wildlife habitat. There are no physical constraints that have been identified on this property that would be negatively impacted by the proposed MR-1 zone district. Therefore, the request is consistent with the Physical Constraints goals and policies of the CMP.

Community Resources: The Community Resources section contains policies that relate to historic structures or sites, scenic corridors, natural features, air quality, light, odor and noise pollution, open space, and trails. No specific community resources have been identified that would be negatively impacted by the proposed MR-1 zone district. Therefore, the request is consistent with the Community Resources goals and policies of the CMP.

Infrastructure, Water and Services: Existing infrastructure and services are available and adequate to support the uses proposed by this Rezoning. If this request is approved, traffic to the site is anticipated to be minimal. The existing access road is maintained by the County. The property is within the Elk Creek Fire Protection District service area and the Jefferson County Sheriff's Office provides law enforcement to the area. Water and wastewater services are provided by onsite well and septic systems. The applicable agencies have reviewed the proposed zoning and there are no concerns. Therefore, the request is consistent with the Infrastructure, Water and Services goals and policies of the CMP.

c. The ability to mitigate negative impacts upon the surrounding area.

Staff has not identified any negative impacts of the Rezoning to the surrounding area. The proposed uses will not result in significant light, air, odor, or noise impacts to the subject or surrounding properties. Visual impacts will be negligible to surrounding properties.

d. The availability of infrastructure and services.

The existing infrastructure and services are available and adequate to support the proposed Rezoning, as stated above.

e. The effect upon health, safety, and welfare of the residents and landowners in the surrounding area.

The proposed land use will not result in significant impacts to the health, safety, and welfare of the residents and landowners in the surrounding area. No unmitigated deleterious effects relating to the proposed Rezoning have been identified.

7. COMMERCIAL MINERAL DEPOSITS

No known commercial mineral deposits exist on the subject property.

8. COMMUNITY MEETING

A Community Meeting was held on June 26, 2024. There were approximately 3 citizens in attendance, one was strongly opposed to a Rezoning that would have the potential to allow a Short-Term Rental in the future along with past violations of operating a Short-Term Rental without zoning allowing such.

9. COMMUNITY/REFERRAL RESPONSES

During the processing of this Rezoning application, Staff received two (2) citizen comments on the subject request. One comment was related to existing on-site structures and the second in general opposition. These concerns have since been resolved by staff and the applicant.

10. AGENCY REFERRAL RESPONSES

This application was sent on referral to 10 Jefferson County Departments & Divisions, 13 external agencies, and 13 registered associations (please see the HOA mailing list in the case packet for more information). The request was sent on two referrals. There are no known outstanding issues with the referral agencies.

11. NOTIFICATION

Notification of the proposed development was sent and posted in accordance with the Zoning Resolution. Please see the attached Notification Summary for more information.

12. SUBSEQUENT PROCESSES

No subsequent process would be required if this Rezoning is approved.

SUMMARY OF STAFF ANALYSIS

Staff's analysis concludes that the proposed Rezoning from MR-2 to MR-1 is in general conformance with the land use policies and recommendations of the CMP. No potential negative impacts to the surrounding community or wildlife were identified, and infrastructure and services are in place to support the use. This application meets all Rezoning criteria specified in the Zoning Resolution. Staff has no unresolved issues related to this Rezoning application. Based upon this and the findings below, staff recommends APPROVAL of the proposed Rezoning.

FINDINGS:

Based on the analysis included in this report, staff concludes that the proposal satisfactorily addresses each of the criteria below which the Planning Commission may consider, as detailed in Section 6 in this staff report.

- 1. The proposal to rezone from Mountain Residential – One (MR-1) to Mountain Residential (MR-2) is compatible with the existing and allowable residential land uses in the surrounding area.**
- 2. The proposal is in general conformance with the Comprehensive Master Plan (Plan). The land use recommendation for an Area of Stability is met because single-family residential dwelling units will be allowed at the same lot size as under the existing zoning, and such residential land use would be consistent with the character, scale, uses, and typical lot sizes of the properties in the general vicinity. All applicable sections of the Plan goals and policies have been met.**
- 3. The ability to mitigate the negative impacts of the proposed land use upon the surrounding area has been considered and no negative impacts were identified.**
- 4. The subject property is served by Elk Creek Fire Protection District and the Jefferson County Sheriff's Office. Water and wastewater services will be provided by onsite well and septic systems. Infrastructure and services are available and adequate to service the property.**
- 5. The proposed land use will not result in significant impacts to the health, safety, and welfare of the residents and landowners in the surrounding area.**

PLANNING COMMISSION ACTION:

The Planning Commission is charged with reviewing the request and staff report, receiving testimony and evidence on the application, and recommending approval or denial of the request to the Board of County Commissioners.

Report Suspicious

Hi Allie!

I have a quick comment about the development application at 28763 columbine dr conifer.

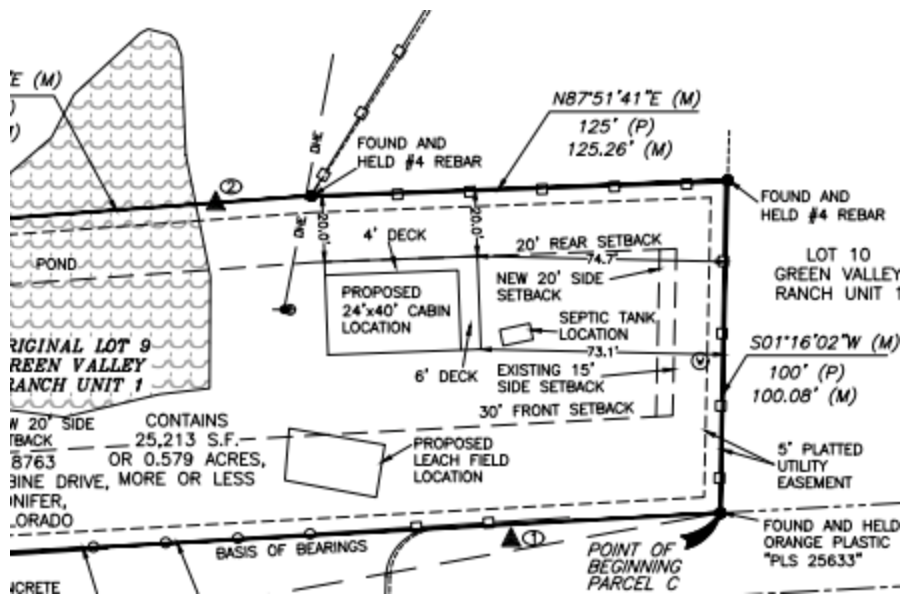

The survey that was done in 2022 and updated in 2024 is not an accurate depiction of the deck structure and another water tower structure on the property. The deck has a section that exceeds the 4' depth shown in the survey, where the hot tub is placed. This deck may not fall within the proper setback requirements for either mr-1 or mr-2, of 20 ft to the rear lot line. Photos below of the deck. The water tower is not included in the survey at all.

I wanted to reach out to make sure this is seen by the county engineers and taken into consideration for this process. Would this be able to proceed with a setback violation?

Thanks!

Nathan Shriver

MEMO

To: Allie McGahee
FROM: Christine Derby
SUBJECT: 24-112415RZ 28763 Columbine Drive
DATE: October 10, 2024

Addressing offers the following comments on this proposal:

1. The purpose of this Rezoning is to Rezone from MR-2 to MR-1 to allow for continued residential use.
2. Access is off Columbine Drive.
3. There is a valid existing address, 28763 Columbine Drive, in the addressing database. This address will not change with this Rezoning but may change with future development.

Please let me know if you have any questions.

Good morning, Allie

CORE Electric Cooperative has reviewed the contents in the above-referenced referral response packet. We reviewed the project for maintaining our existing facilities, utility easements, electric loading, and service requirements. We are advising you of the following concerns and comments:

CORE Electric Cooperative has an existing transmission line and overhead electric facilities on the subject properties. CORE Electric Cooperative will maintain these existing utility easements and facilities. CORE Electric Cooperative will require that all structures and landscaping maintain adequate clearances to the transmission line and allow for CORE Electric Cooperative to access the transmission line for maintenance purposes. In addition, CORE Electric Cooperative will require a grading profile if any grading work is to be done which could affect clearances or access to the transmission line.

CORE Electric Cooperative in the future will be expanding the current transmission right of way to seventy-five (75') feet in width and rebuilding the existing 44 kV transmission to a 115 kV.

CORE Electric Cooperative approves the rezoning the parcels.

Respectfully

Brooks Kaufman

Hello Allie,

Regarding this case (24-112415RZ) CSFS has the following response:

___ **The Colorado State Forest Service does not need to receive any further referrals on this case.** No site visit or forest management plan is necessary for the proposed action on this property. Either we have no concerns, or our concerns for the proposed action on this property would be addressed with the defensible space requirements of a County building permit. See additional comments below.

X A Wildfire Mitigation Plan (Forest Management Plan) is **NOT** necessary for the proposed action on this property. However, the **Colorado State Forest Service will need to further review this case and/or visit the site to develop specific recommendations to address wildfire hazard mitigation and/or forest health needs for the property.** A \$200 review fee must be submitted for CSFS costs associated with this further review.

___ **A Wildfire Mitigation Plan (Forest Management Plan), prepared by an individual meeting Jefferson County standards, is recommended for this case.** A \$300 review fee must be submitted for CSFS costs associated with the review of the Plan. Please give the applicant a copy of the Jefferson County Planning & Zoning Department's **Wildfire Mitigation Plan** requirements, and have them contact the Colorado State Forest Service - Golden Field Office at 303-279-9757 to discuss plan needs.

Additional Comments: Defensible space will need to be created around any new structures such as the proposed new cabin.

Case Number 24-112415 RZ
Pt. S½ of the NW¼ Section 27, Twp. 6S, Rng. 71W, 6th P.M.
Water Division 1, Water District 80

Dear Ms. McGahee:

We have reviewed the above referenced application for a Rezoning from MR-2 to MR-1 to accommodate STR. The submitted material does not appear to qualify as a “subdivision” as defined in section 30-28-101(10)(a), C.R.S. Therefore, pursuant to the State Engineer’s March 4, 2005 and March 11, 2011 memorandums to county planning directors, this office will only perform a cursory review of the referral information and provide comments regarding the proposed water supply. The comments will not state an opinion on the adequacy of the water supply or the ability of the water supply plan to satisfy any County regulations or requirements, and cannot be used to guarantee the physical availability of water.

The application documents indicate that Lot 9 and Tract B of Green Valley Ranch Unit 1 have been adjusted. As a result of the lot line adjustment, Lot 9 will increase in size to 1.009 acres and Tract B will decrease in size to 1.493 acres.

The water supply for Lot 9 is an existing well with permit no. 322217. Well permit no. 322217 was issued pursuant to section 37-92-602(3)(b)(II)(A), C.R.S., as the only well on a tract of land of 0.57 acres described as lot 9, filing 1, Green Valley Ranch Subdivision. The well is permitted for use inside one single family dwelling, no outdoor use is permitted. The well must continue to be used in accordance with its permitted terms and conditions. The lot reconfiguration and rezoning will not impact the validity of permit no. 322217 or its allowed uses.

The water supply for Tract B is an existing well with permit no. 335866. Well permit no. 335866 was issued pursuant to section 37-92-602(3)(b)(II)(A), C.R.S., as the only well on a tract of land of 2.469 acres described as Tract B. The well is permitted for use inside one single family dwelling, no outdoor use is permitted. The well must continue to be used in accordance with its permitted terms and conditions. The lot reconfiguration and rezoning will not impact the validity of permit no. 335866 or its allowed uses.

Should you or the applicants have any questions regarding this matter, please contact Kate Fuller of this office at 303-866-3581 ext. 8245 or kathleen.fuller@state.co.us.

Sincerely,

A handwritten signature in black ink, appearing to read "K. Fuller". The signature is fluid and cursive, with the first letter of the last name being a large, stylized capital 'F'.

SUBJECT: Case #24-112415 RZ
Susan Mead
28763 Columbine Dr

The applicant has met the public health requirements for this rezoning case. Jefferson County Public Health still recommends that a maximum occupancy of six (6) people or maximum onsite wastewater treatment system design flow of 450 gallons per day be included in the written restrictions.

PROPOSAL SUMMARY

To rezone from MR-2 to MR-1 to allow for continued residential uses, including a short-term rental.

COMMENTS

Jefferson County Public Health (JCPH) provided comments on October 4, 2024 regarding the proposed rezoning of this property. We reviewed the documents submitted by the applicant for this second referral rezoning process and have the following comments:

The applicant must submit the following documents or take the following actions prior to a ruling on the proposed rezoning of this property. NOTE: Items marked with a “✓” indicate that the document has been submitted or action has been taken. **Please read the entire document for requirements and information. Please note additional documentation may be required. Failure to provide the required documentation may delay the planning process.**

		Include a maximum occupancy of six (6) people or maximum OWTS design flow of 450 gallons per day be included in the written restrictions.	Wastewater
✓	05/21/2025	Submit a current notarized Environmental Questionnaire and Disclosure Statement in accordance with the Jefferson County Zoning Resolution and Land Development Regulation (LDR) Section 30.	Environmental Site Assessment

WATER SUPPLY (LDR 21)

The Jefferson County Zoning Resolution (Section 9 C.21) and the Land Development Regulation (LDR) Section 21.B.2.a (1) require proof of legal water, such documentation may include, but is not limited to, a copy of the well permit or water court decree. The Colorado Division of Water Resources (CDWR) is the governing authority for wells. As such, the applicant should contact the Colorado Division of Water Resources at 303.866.3581 who will determine if the applicant has a legal right to the water supply.

Water Dependability

JCPH advises all parties to note that the long-term dependability of any water supply in Colorado, be it surface water, ground water, or a combination of surface water and ground water, cannot be guaranteed. All ground water and surface water supplies are subject to fluctuations in precipitation. During periods of drought, it will be necessary to carefully manage all uses of water so that the basic water supply needs for human health can be met.

WASTEWATER (LDR 22)

The applicant provided a letter from the Jefferson County Planning and Zoning Division dated March 30, 2022, assigning 28763 Columbine Drive to PIN 300200620, Parcel ID: 61-273-99-002 which was for the old address 11935 Pinon Road. It appears that this address was reassigned to 28763 Columbine Drive. 11935 Pinon Road was the old address per the cover letter submitted by the applicant.

OWTS Report

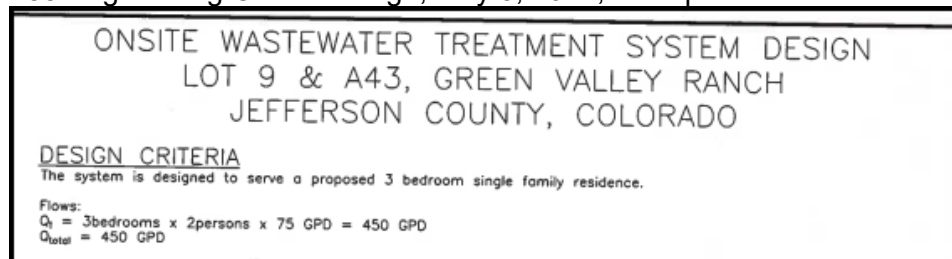

The applicant submitted an Onsite Wastewater Report (Form 6001) in accordance with LDR Section 22.B.2. (a). Roger Shafer, P.E., certifies that the existing onsite wastewater treatment system will support the proposed uses.

Existing OWTS Records

JCPH has records of an existing onsite wastewater treatment system that was installed in 2021 to serve a 3-bedroom single family dwelling to serve 11935 Pinon Road with a maximum design flow of 450 gallons per day (Permit # 21-118588 HLT OW).

The engineer evaluation dated April 26, 2022, prepared by 285 Engineering provided a design for a 3-bedroom (maximum of a six (6) person occupancy) or 450 gallons per day high level treatment OWTS.

285 Engineering OWTS Design, May 3, 2021, excerpt:

Prior to installing, altering, upgrading, remediating, or repairing an onsite wastewater treatment system (OWTS) the applicant must receive a permit from Jefferson County Public Health. The applicant must submit an OWTS application, associated documents, and applicable fees to this Department for an approved permit to install the OWTS. Contact Mitch Brown at 303.271.5767 or mlbrown@jeffco.us for more information on this process.

Onsite wastewater treatment systems with an average daily flow of more than 2,000 gallons per day per property must comply with the Colorado Water Control Act, Article 8, Title 25 of the Colorado Revised Statutes, and Regulations adopted by the Colorado Water Quality Control Commission. Site approval from the Colorado Department of Public Health and Environment is required. Jefferson County Public Health will provide reviews and comments to the Colorado Department of Public Health and Environment on the site application.

Short Term Rentals

Short term rentals on an onsite wastewater treatment system (OWTS) present a concern of heavy usage on the OWTS that may result in malfunction or failure, which could lead to a public and environmental health hazard. Many of those in the industry who have worked with maintenance or repairs of OWTS, have reported an anecdotal higher incidence of malfunction or failure among short term rentals.

Short term rentals tend to operate the system at **or beyond** its hydraulic loading capacity as there are typically a high number of users on the system. In addition, the organic loading of the system is also put at risk with the increased number of users and users who are not familiar with careful usage of an OWTS.

The cover letter provided with this case submittal is to rezone the existing property to accommodate the use of the single-family dwelling as a short-term rental. The existing OWTS has a maximum design flow of 450 gallons per day. As such, **per the JCPH short term rental policy, this dwelling is limited to a 6-person occupancy and maximum OWTS design flow of 450 gallons per day.**

JCPH recommends that a maximum occupancy of six (6) people or OWTS design flow of 450 gallons per day be included in the written restrictions.

Guidance for Short Term Rentals on Onsite Wastewater Treatment Systems
Jefferson County Public Health. August 7, 2023

Statement of Position:

Short term rentals may only be occupied up to the number of bedrooms or design flow allotted per the system on the permit on record. For properties that are served by an OWTS, Planning and Zoning should refer to the OWTS permit and permit date to determine the capacity of occupancy based on the adequacy of capacity of the existing OWTS.

The Onsite Wastewater Regulations require that a system be designed on the daily design flow, which is also dictated by the number of bedrooms. Although, sometimes an OWTS may have a larger design flow than the number of bedrooms, the most limited number of bedrooms or design flow should be what determines the upper limit of the capacity that the system was designed to handle and thus would be the upper limit of allowed occupancy.

ENVIRONMENTAL ASSESSMENT (LDR 30)

JCPH has reviewed the Environmental Questionnaire and Disclosure Statement (EQDS) dated **November 4, 2024**. The applicant checked "No" on all categories of environmental concern on the cover sheet. From this information, it does not appear that any recognized environmental conditions exist that would negatively impact the property at the time the EQDS was signed.

Should stained or discolored soil or contaminated groundwater be encountered during construction and excavation of this area, the contractor must cease operations and contact a professional engineer licensed in Colorado or equivalent expert to further evaluate the soil and/or groundwater conditions, the nature and extent of the contamination, and determine the proper remediation and disposal of the contaminated material. The contractor must contact the CDPHE, Hazardous Materials and Waste Management Division at 303.692.3320

NOTE: These case comments are based solely upon the submitted application package. They are intended to make the applicant aware of regulatory requirements. Failure by Jefferson County Public Health to note any specific item does not relieve the applicant from conforming to all local, state, and federal regulations. Jefferson County Public Health reserves the right to modify these comments, request additional documentation, and or add appropriate additional comments.

RE: PROOF OF FIRE PROTECTION - 28763 COLUMBINE DRIVE, CONIFER

To Whom It May Concern:

Property owner, Susan Mead, is requesting a proof of fire protection letter to re-zone the above listed property to allow for legal short-term rental use. On behalf of the Elk Creek Fire Protection District, I have the following comments regarding the above-mentioned property:

1. The property is within the boundaries of the Elk Creek Fire Protection District. The Elk Creek Fire Protection District will provide emergency services to this property to the best of their ability.
2. Site access is existing and acceptable. We did not evaluate it for conformance to the current County Standards.
3. If rezoned to allow for short term rental use the following will have to be met:
4. It's the owner's responsibility to:
 - a. Install adequate address signage visible from the road as required by 502.1.
 - b. Install and maintain a minimum 2A10BC portable fire extinguisher on each floor level in a readily accessible location.
 - c. Install and maintain smoke alarms as required by Section 907.2.11.2.
 - d. Install and maintain carbon monoxide detectors as required by Section 915.1.4.
 - e. Install and maintain operable egress windows in each sleeping room complying with Section 1031.
 - f. Install and maintain GFCI protection or receptacles as required by NFPA 70.
 - g. Maintain year-a-round fire apparatus access and snow removal for private roads and driveways.
 - h. Manage guest parking and maintain emergency vehicle access to the structure.
 - i. Notify tenants of the high wildfire risk, fire safety precautions, emergency notification options, emergency evacuation procedures, primary and secondary evacuation routes, burn restrictions, etc.
5. These comments are based on currently available information. If plans or conditions change in the future, there may be additional requirements.

Please contact me by email at rrush@elkcreekfire.org if I can be of further assistance.

Case Number 24-112415 RZ
Pt. S½ of the NW¼ Section 27, Twp. 6S, Rng. 71W, 6th P.M.
Water Division 1, Water District 80

Dear Ms. McGahee:

We have reviewed the above referenced application for a Rezoning from MR-2 to MR-1 to accommodate STR. The submitted material does not appear to qualify as a “subdivision” as defined in section 30-28-101(10)(a), C.R.S. Therefore, pursuant to the State Engineer’s March 4, 2005 and March 11, 2011 memorandums to county planning directors, this office will only perform a cursory review of the referral information and provide comments regarding the proposed water supply. The comments will not state an opinion on the adequacy of the water supply or the ability of the water supply plan to satisfy any County regulations or requirements, and cannot be used to guarantee the physical availability of water.

The application documents indicate that Lot 9 and Tract B of Green Valley Ranch Unit 1 have been adjusted. As a result of the lot line adjustment, Lot 9 will increase in size to 1.009 acres and Tract B will decrease in size to 1.493 acres.

The water supply for Lot 9 is an existing well with permit no. 322217. Well permit no. 322217 was issued pursuant to section 37-92-602(3)(b)(II)(A), C.R.S., as the only well on a tract of land of 0.57 acres described as lot 9, filing 1, Green Valley Ranch Subdivision. The well is permitted for use inside one single family dwelling, no outdoor use is permitted. The well must continue to be used in accordance with its permitted terms and conditions. The lot reconfiguration and rezoning will not impact the validity of permit no. 322217 or its allowed uses.

The water supply for Tract B is an existing well with permit no. 335866. Well permit no. 335866 was issued pursuant to section 37-92-602(3)(b)(II)(A), C.R.S., as the only well on a tract of land of 2.469 acres described as Tract B. The well is permitted for use inside one single family dwelling, no outdoor use is permitted. The well must continue to be used in accordance with its permitted terms and conditions. The lot reconfiguration and rezoning will not impact the validity of permit no. 335866 or its allowed uses.

Should you or the applicants have any questions regarding this matter, please contact Kate Fuller of this office at 303-866-3581 ext. 8245 or kathleen.fuller@state.co.us.

Sincerely,

A handwritten signature in black ink, appearing to read "K. Fuller". The signature is fluid and cursive, with the first letter of the last name being a large, stylized 'F'.
